The first or main page of the webpage is the home page. The second layer provided is the about streaming in the United States. The what is a stream is the categorize a true stream and how its calculated. I will have a dial box in the initial opening of the tab for people to guess how many streams it would take to go bronze, silver, gold, or platinum. The tab about copyright laws is for informing users of how streaming platforms hurt artists. The subsection under copyright laws will show court cases and how their decision affected what is considered as a stream. The should I care tab then takes information from the how it effects the artist and applies the same methodology with other industries. The what can I do sub tab is for the form to sign a petition redesign the streaming number for artists. Artist fighting for equality will have a few big named artists who oppose streaming and its purpose.
